.kill Immediately notify Lamont Safety at x555 or (845) 359-2900.
.kill Try to determine the identity of the inhaled material. Obtain an MSDS.
.kill If the employee is conscious and there is no threat to health, move the employee to fresh air.
.kill If an employee is found unconscious in an area of the laboratory where chemical vapors may pose an immediate threat, do not enter the area. Immediately call Lamont Safety (x 555) for assistance.
.kill Monitor the employee from a safe distance.
.kill The affected individual should seek medical attention as soon as possible.*

CHEMICAL SPILL ON BODY

⚠️ Do not attempt to wipe or brush hazardous chemicals from yourself.
⚠️ Flush the exposed area with tepid water from the faucet or deluge hose for 15 minutes.
⚠️ Remove contaminated clothing at once. To prevent eye and facial contamination, cut garments away rather than pulling them over the head.
⚠️ Remove shoes to ensure that chemical and contaminated water has not accumulated.
⚠️ Obtain material safety data sheet (MSDS) for hazard information.
⚠️ Seek medical attention if necessary.

BIOLOGICAL SPILL ON BODY

⚠️ Remove and bag contaminated clothing.
⚠️ Vigorously wash exposed area with soap and water for 5 minutes.
⚠️ Obtain medical attention, if necessary.*
⚠️ Report the incident to supervisor.
